

Our Mission

Saluvis is a wellness company committed to providing only natural products, therapies, and services that support the body's inherent healing power. Partnering with Thi Allan Bioherbs was a smooth process, as both companies are aligned in their mission to offer the finest and purest products to aid in healing.

Testimonial

Have been using this product for 2 months...from frequent urination, every 5 minutes to the toilet, now less urinating, only twice a night. Also can stand long hours drive without a toilet break. This capsule really works wonders – Fred P

When the intention is pure, so is the product.

PROSTASANO

500mg x 60 capsules

Traditionally Used To Improve Urination In Men

SALUVIS

Our Product

This traditional time-tested **herbo-mineral** formulation helps to improve urination in men. The ingredients also help with **prostate wellness**. Only natural ingredients are used in this formulation. No excipients or synthetic chemicals are added.

Caesalpinia bonducella (Fever Nut) – Traditional herb used for thousands of years with many therapeutic uses. The seeds possess the strongest **anti-inflammatory** properties. It is the key medicinal plant used for treatment of various ailments including high blood sugar and prostatic hyperplasia.

Tribulus terrestris (Puncture Vine) – The herb king well-known to improve men's **vitality and boost libido**. Laboratory and animal studies show that Tribulus has medicinal effects against high blood pressure, diabetes, inflammation, infection, and cancer.

Asphaltum punjabinum – Popularly known as **Shilajit**, the black gold of the Himalaya's. It is a mystical mineral that oozes from the cracks of rocks in the Himalayan mountains. It is formed over centuries by the decomposition of plant and microbial matter. It is rich in minerals, fulvic acid, and other bioactive compounds that are believed to be the source of its remarkable health benefits. It has **anti-inflammatory**, anti-oxidant, anti-aging, energy-boosting and many other health properties.

The Benefits

Signature formulation for:

- Stabilizes Urination
- Improve Prostate Function
- Strong Anti-Inflammatory Properties

Why Prostasano?

- 100% Natural Herbo-Mineral Ingredients
- No Synthetic Chemical Additives / No Excipients
- Time-Tested Proven Traditional Formulation
- Noticeable Early Improvements
- Life-time Use Not Required

Our ancestors lived a life that was harmoniously close to nature to heal all ailments and stay healthy. Thus, the saying, **"Let food be your medicine and medicine be your food."**

The Facts

Evidence-based, Signature Formulation:

- In a research study titled Administration of Caesalpinia bonducella Seed Extracts Ameliorates Testosterone-Induced Benign Prostatic Hyperplasia (BPH) in Male Wistar Rats published in Research and Reports in Urology 2022:14 225–239, the researchers reported that C. bonducella seed extracts treatment significantly decreased prostate weight and prostatic index in rats with TP-induced BPH. The seed extracts exhibited a potent inhibitory effect on dihydrotestosterone (DHT) in serum and prostate. In addition, the PSA level in the serum showed a noteworthy decrease in comparison with the BPH group. The researchers also mentioned that C. bonducella seed extracts could be a potential source for the formulation of new drug for managing BPH.
- In another research article titled Herbal Drugs in Benign Prostate Hyperplasia (BPH). A Current Update published in International Journal Pharmaceutical Science and Research (2020), Volume 11, Issue 2, the researchers reported that Tribulus terrestris is one of the herbs that has shown significant effect on BPH by its anti-inflammatory and antiseptic effect on genito-urinary tract.
- A research study titled Effect of Shilajit on Testosterone Induced Benign Prostate Hyperplasia in Rats published in International Journal of Science and Research Volume 3 Issue 12, December 2014, has shown that shilajit have significantly inhibited the elevation in prostate weight and showed protective effects against testosterone induced prostatic hyperplasia in rats.
